

#### A. Zoom out, the context

This disposable camera I carry around everywhere. Usually it is located in my bag. Otherwise it is in my room.

It relates to my immediate surroundings because I always have it around me to capture the moments that are special to me. So it is something very personal and close to me.

#### B. Zoom in, specific details

What aspects make this an interface for me. The camera itself has instructions on it to show the user how to use it correctly. It communicates itself to the user. That to me is an interface between a product and a person.

- The user in case of this camera is the person who makes a photograph. It can be anyone. As long as they hold this camera.
- The system that is connected is the old use of a disposable camera connected with the user of 'this' time. A human connected to a camera.
- The affect it can have on the user. The user learns how to use this camera. The user then takes a picture which for me is an exciting experience with happy memories.
- The user can interact by taking a picture. Then the user uses the functions of the camera . Developing the roll, pressing the button.
- The material properties, plastic, roll of film, hardness.

#### A. Zoom out, the context

The toaster in my kitchen. Its located in my kitchen and is related to my surroundings because I use it every morning to toast my bread. I use it in my daily routine.

#### B. Zoom in, specific details.

The toaster is an interface to me because it has instructions on it that communicate the usage to the person. The product, machine communicates itself to a person through these instructions.

- The user is the person who wants to toast their bread. So any person that is in my house that likes toasted bread.
- The system, the instructions, connect the user with the toaster.
- The affect it can have on the user. The user decides how toasted the bread has to be by choosing a number and setting. So the user thinks do and experiences.
- The interaction is the user pressing the buttons and putting bread in the toaster.
- The material properties, metal, plastic, heater
